

# Spreadable Geraniol for Playgrounds

REPELS MOSQUITOES, FLIES,  
GNATS AND NO-SEE-UMS.  
NON-TOXIC PATENTED FORMULA.

## APPLICATIONS

Spreadable Geraniol for Playgrounds is a mixture of all-natural corn cob and naturally derived Geraniol oil that is ideal for reducing the number of blood-feeding insects in areas where children are gathering or playing, or for concerts, fairs, parks, or other outdoor activities. On playgrounds, sprinkle 1 cup of granular repellent over every 100 sq. ft. of area. For parks, fairs or outdoor concerts, use a granular spreader and make grids 50 ft. sq. This will set up a barrier to keep insects out and deter the insects in that area. Depending on temperature, time of year and insect activity, daily application may be required.

Spreadable BugBand is biodegradable and does not significantly contribute to landfill volume. Highly effective and lightweight for reduced shipping cost. Fresh citrus fragrance. Independently tested with amazing results.

#88803M  
Spreadable Geraniol  
for Playgrounds
